

We asked – You answered – We listened

Thank you for participating in our education survey! We have completed reviewing the results and have prepared the following summary.

Many of the survey respondents answered that they feel well informed about course offerings. The Education Team sends a monthly email notice of all upcoming classroom courses. Additional communication highlighting other offerings is also sent via email from other GE sources. If you are not getting these emails, please let us know at ambulatoryapps@ge.com.

Customers who have participated in classroom training feel the courses are meeting the needs of their organizations. Many of the courses that were requested in the survey results are currently available. We encourage you to visit:

- [Services Portal](#) (for documentation, downloads, recorded webinars, etc)
- [Centricity Customer Portal](#) – CCP (for online/CBT training)
 - If you do not have access to CCP – [click here](#)
- [Education website](#) (for classroom offerings/registration, general information)

Based on survey feedback, the Education Team is working on adding new courses to our catalog.

Most of our current classroom offerings are held in our Boston, Barrington, and Seattle training centers. Many survey respondents indicated they would be more likely to attend a course if it were more regionally located or better yet, virtualized. The technical aspects of some of the courses we offer require a more hands-on approach.

Regional and virtualized classroom training has been an ongoing challenge and with travel costs rising and travel budgets falling, we are looking at other ways of deploying these technical offerings while at the same time maintaining a high level of interaction. We are reviewing many of the locations submitted and working toward providing more regionalized offerings for you.
